Final curriculum & schedule to follow

Unique Roundtable Format

Using the Case Study method, IANS has developed the most innovative discussion format in the security industry today - sophisticated conversations with your peers.

Continuing Education Credits

IANS exclusive partnership with the (ISC)2 allows holders of the CISSP to have 16 continuing education hours credited directly to their account.

Cityplace Conference Center

Cityplace is conveniently located ½ mile north of downtown on the southeast corner of Haskell and Central Expressway. Cityplace provides complimentary underground parking and is easily accessible via all major interstates, the DART transit system and the DART light rail station located inside the building.

World-Class Faculty

Becky Bace - noted network security expert & author

Eric Cole - author of *Hiding in Plain Sight*, *Hackers Beware*, *Network Security Bible* & *Insider Threat*

Joshua Corman - technical visionary and leader of The 451 Group's enterprise security practice

Rocky DeStefano - Over fifteen years of experience in information security and holds several industry certifications.

Chris Hoff - Chief Architect of Security at Unisys and is the recipient of Information Security Magazine's 2005 Security 7 Award

Peter Kuper - Research Analyst

Steve Noel - Security Compliance Manager, Constellation Energy

Angela Orebaugh - Industry recognized security technology visionary and scientist

Jack Phillips - Co-Founder & CEO, IANS

Marcus Ranum - Consultant and security products designer, principal author of several major firewall products, including DEC Seal, the TIS Gauntlet and the TIS Internet Firewall Toolkit

Ron Ritchey - Conducts penetration testing for IATAC, co-author *Inside Network Perimeter Security*

Randy Sabett - JD, CISSP, Partner, Sonnenschein Nath & Rosenthal LLP

Nick Selby - Founder of the 451 Group's Enterprise Security Practice - penetration testing and data leakage expert.

Glen Charlun - Founded an advanced intrusion & deception lab at DoD Research Center; lead the Marine Corps global monitoring and emergency response team

Aaron Turner - Former Cybersecurity Strategist for the Department of Energy's Idaho National Laboratory

Why Join the Forum

Information Security Forums are the leading peer-based, CPE-accredited events. Intimate and conversational, IANS limits the Forum to 200 practicing Information Security professionals. Information Security Forums are about tactics not theory, real-life experience not academic studies, they're confidential, vendor neutral and press-free.

As a Forum Delegate, you will gain insights on the best practices and lessons learned directly from your peers; stay up to date with emerging technologies and early-stage deployments; and network with influential peers and Faculty.

About IANS

IANS is a Boston-based research company that focuses exclusively on the fields of information security, regulatory compliance and IT Risk Management. IANS mission is to deliver technical and business insights that assist our clients in solving their most pressing problems.

IANS serves its clients through a unique "bottom-up" research methodology. The combination of our world-class Faculty and closed community of end-users, drive IANS' insights, curriculum and dialogues. IANS offerings include the Partner Program annual research membership, regionally-held Information Security Forums, peer-based Executive Roundtables, and a custom collection of Advisory Services.

IANS was founded in June of 2001 as the Institute for Applied Network Security. Inspired by the Harvard Business School experience of interactive discussions driving collective insights, IANS adapted that format to fit the needs of the information security professionals.

For more information, please call 617.399.8100 or visit www.ianetsec.com.

"The Forum was unlike any conference I have previously attended. I gained a wealth of knowledge that is readily applicable to my current security projects. This was first time attending, but it won't be my last!"

- Forum Delegate 2009
